

Doctors leaflet patient information - relevant points on data protection

- Patient data are transmitted to labor team w together with the sample.
labor team w needs this data:
 - to ensure that samples are not mixed up,
 - to be able to better classify age- and gender-specific laboratory values and
 - to enable any additional orders for analysis.

- labor team e meets the strictest data protection requirements.
- Labor team w employees are subject to professional secrecy.
- Results are only sent to the practice and, if desired, to the patients via protected channels.
